About Armada Logics

Your A-Team from Ground Zero to Growth

Armada Logics is the evolution of a decade-long journey in elite software engineering and startup development. The company traces its roots back to 2011, when its founding team joined **Village 88**, a startup incubation studio in **San Jose, California**, founded by visionary EdTech entrepreneur **Michael Choi**.

As engineers at Village 88, the team built **enterprise-level web and mobile applications** for fast-growing companies in **Silicon Valley**, developing mission-critical systems that powered innovation.

By **2012**, the team took on a central role in **bootstrapping Coding Dojo**, one of the most successful coding bootcamps in the United States. They architected and developed the core systems that enabled Coding Dojo's bootcamp operations. Since its inception, Coding Dojo has helped **over 20,000 graduates** break into the tech industry and secure jobs at leading technology companies. In **late 2022**, Coding Dojo was **acquired by Perdoceo Education Corporation**, a publicly traded education company.

Building on this legacy of startup success and product excellence, **Armada Logics was founded in 2024** by the seasoned software engineers of Village 88, under the leadership of **CTO John Supsupin**. With a mission to support entrepreneurs and businesses from ideation to growth, Armada Logics brings proven expertise, Silicon Valley-caliber talent, and a track record of successful innovation to every project.
